

P1 Abagnale Vincenzo

Novel biomolecules modulating viral RNA capping machinery in CoV infection

P2 Ajayi Oluwasegun Eric

Copper calling: myxinidin and the atcun motif in metal binding

P3 Avitabile Concetta

Rational Design, Synthesis, and Immunogenicity of HER2-Derived Peptide Vaccines against Breast Cancer

P4 Barisciano Giovannina

Preparation and Testing of Drug-loaded Lipid Nanoparticles decorated with anti-lysyl oxidase antibodies.

P5 Bettin Giacomo

Generation and Characterization of Macrocyclic Peptide Ligands for Therapeutically Relevant Protein Targets

P6 Biondi Barbara

The proline-rich antimicrobial peptide Lip1 as scaffold for the Development of Novel Antimycobacterial Agents: a Structure–Activity Relationship Study

P7 Tinatini Bukia

Peptide-Like Benzenesulfonamides as Selective Inhibitors of human Carbonic Anhydrase IX and X

P8 Campagna Erica

Cathepsin-B activable prodrugs of histone deacetylase inhibitors

P9 Caporale Andrea

Andrea Structure–Activity Relationships of the proline-rich antimicrobial peptide Bac7(1–35) for the Development of Novel Antimycobacterial Agents

P10 Casciaro Bruno

Exploring the Synergistic AMP-combination Temporin A and the proline-rich B7-005 Against *Pseudomonas aeruginosa*

P11 Ciobanasu Corina

Corina Peptide-based dual receptor targeting strategies for cancer diagnosis and therapy

P12 Colletta Miria

Bicyclic peptide mimicry of the cripto-1 EGF-Like domain

P13 Costabile Martina

Peptide mapping of Zika virus EDIII reveals an immunodominant epitope for monoclonal antibody development

P14 De Palma Francesca

Fermentation improves bioactive peptides, polyphenol bioaccessibility and anti-inflammatory activity of chickpea flours

P15 Di Somma Angela

Human Histone Fragments Display Antibacterial Properties against *Pseudomonas aeruginosa*

P16 Diana Donatella

Insight into the molecular recognition of ZO1-PDZ2 by viral Envelope derived peptides

P17 Doti Nunzianna

Exploiting conformational plasticity to target the CypA surface

P18 Fasano Francesca

Shielding siRNA by peptide-based nanofibers: An efficient approach for turning off EGFR gene in breast cancer

P19 Formaggio Fernando

Ferrocene-peptide conjugates with antibacterial properties

P20 Fusco Virginia

Aggregation and neurotoxicity: synergistic effects of NPs and NTD-HuPrP

P21 Giorgio Anna

Development of novel metal-RGDechi bioconjugates for integrin targeted cancer diagnosis and therapy

P22 Grasso Nicola

Discovery of G-quadruplex-binding peptides via structure-based and sequence alignment approaches

P23 Hernández Tanguma Alejandro

Evolution-based optimization of membrane-selective peptides

P24 Hovsepyan Kristina

Synthesis of bioactive peptides with non-proteinogenic amino acids via solid-phase and activated ester approaches

P25 Iaccarino Emanuela

Synthesis and structural investigation of the GRP78 domain involved in Cripto-1 signalling

P26 Kubasik Izabela

The effect of pathogenic yeast stimulation on the composition and biological activity of *Lucilia sericata* larval secretions

P27 Liruzzo Agata Greta

KLVFF Functionalized Graphene Oxide For Selective Alzheimer's Disease Biomarkers Detection

P28 Lobinska Gabriela

Benchmarking Evo2 for enzyme generation

P29 Mangoni Marialuisa

Targeting CFTR Dysfunction and Airway Infection in Cystic Fibrosis with Multifunctional Frog skin-derived Peptides

P30 Mannan Talha

D. melanogaster and C. capitata transformer-2 proteins: identification of the basis of target RNA recognition.

P31 Marino Sabrina

Tuning formulation parameters of Fmoc-FF Nanogels

P32 Moccia Maria

Unlocking miRNA Detection with PNA-Based Sensing Technologies

P33 Mollica Adriano

Design of tert-Leu-containing Lonidamine scaffolds bearing arginine side-chain mimetic substitutions on the indazole ring as novel β -arrestin-avoiding CB1 ligands

P34 Monferone Alan

A combinatorial platform for the discovery and characterisation of yeast-encoded macrocyclic peptide ligands

P35 Monti Alessandra

Peptide inhibitors of CHCHD4: leveraging substrate-binding motifs to tune mitochondrial redox homeostasis.

P36 Oliver Angela

Peptide-based site-specific conjugation of ageritin to antibody fragments to generate cell-permeable ribo-immunotoxins

P37 Oliver Angela

Development of humanized anti-Nodal monoclonal antibody

P38 Pennacchio Simone

Modular Surface Functionalization of Liposome Nanoparticles via Post-Insertion of Lipopeptides

P39 Raiola Andrea Giuseppe

Making Solid-Phase Peptide Synthesis Greener: Exploring Ultrasound-Driven Sustainable Strategies

P40 Rinaldi Antonia

Mitigating Pyroglutamate in Microwave-assisted SPPS: side-reaction control and Sequence-Structure Influence

P41 Romano Luigi

Poly-L-Lysine doped FmocFF Nanogels as delivery platforms for siRNA

P42 Rosa Mariangela

Peptide-based nanogels for potential siRNA delivery

P43 Rotondo Martina

Structural Determinants of G-Quadruplex in a Vimentin-derived Peptide

P44 Ruvo Menotti

A selective JNK3-targeting miniprotein confers neuroprotection in a mouse model of ischemic stroke

P45 Sandomenico Annamaria

Biochemical and Biophysical characterization of anti-CD7 scFv fragment targeting human T-cell acute lymphoblastic leukemia

P46 Sandomenico Annamaria

A semi-synthetic approach for the generation of BisAb using recombinant Fab fragments

P47 Sciortino Noemi

Exploring the KCASH2–MAD2A axis: from experimental identification to computational structural insights and rational peptide design

P48 Sordillo Alessia

Study of Human Antimicrobial Peptides Active Against Some Bacteroidota Species of the Oral Cavity

P49 Tamarro Francesco

Rational design and synthesis of bioactive miPEP205-derived fragments as modulators of Wnt/ β -catenin signaling in triple-negative breast cancer

P50 Tamarro Lidia

Temporin-A Targets the PilSR Regulatory System to Inhibit Motility and Virulence in *Pseudomonas aeruginosa*

P51 Tesauro Diego

pH-Sensitive Dipeptide Hydrogel for Injectable and Stimuli-Responsive Delivery

P52 Trisciuzzi Daniela

Target Mapping in Cancer: Ligandable Protein Pockets on 3D OncoPPI Networks

P53 Venanzi Mariano

Liquid-liquid separation and gel formation of CIGB-814, a therapeutic peptide with anticancer activity

P54 Vetrano Carlo

Disarming *Pseudomonas aeruginosa*: a biological study of Temporin A as an Antivirulence Agent

P55 Voss Jona

On Demand Activation of Cryptophycin Drug Conjugates by Click Chemistry

P56 Vuolo Marco

Lysine rich D,L peptide based amphiphiles with antimicrobial activity

P57 Iaccarino Emanuela

Evolving short FPR1 peptide antagonists into a platform for theranostic molecular imaging of FPR1-expressing tumours: design and screening of labelled derivatives.

P58 Minopoli Michele

Evolving short FPR1 peptide antagonists into a platform for theranostic molecular imaging of FPR1-expressing tumour: stability, brain permeability and anti-tumor activity.

P59 Taie Giulia

Evolving short FPR1 peptide antagonists into a platform for theranostic molecular imaging of FPR1-expressing tumours: preclinical imaging studies
